Election/Restrictions

1. The inventions are distinct, each from the other because of the following reasons:
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-32 and 64-75, drawn to 3D measurement of the shape or outline of a surface of an optical member, classified in class 702, subclass 167.
 - II. Claims 33-63 and 76, drawn to testing the refraction of an optical member classified in class 356, subclass 128.
3. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as establishing a manufacturing process for the making of an optical device based on the measured refractive-index characteristics. See MPEP 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
